Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 61-92, drawn to method, media player device and server for delivering/sharing playlist based on user profiles, classified in class 725, subclass 46.
 - II. Claims 93-96, drawn to method for automatically updating playlists, classified in class 709, subclass 248.
 - III. Claims 97-108, drawn to method and media player device for presenting a playlist to select at least one item the playlist for playback, classified in class 707, subclass 102.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case, invention I is directed to method, media player device and server for delivering/sharing playlist based on user profiles, invention II is directed to method for automatically updating playlists, and invention III is directed to method and media player device for presenting a playlist to select at least one item the playlist for playback. Therefore, inventions I, II and III have different modes of operation and they have different effects.

3. These inventions are distinct for the reasons give above and the research required for each group is different and not co-extensive for examination purpose. For example, the searches for the three inventions would not be co-extensive because these groups would require different searches on PTO's classification as following:

Group I search (claims 61-92) would require use of search **Class 725, subclass 46** (not require for the inventions II and III).

Group II search (claims 93-96) would require use of search **Class 709, subclass 248** (not require for the inventions I and III).

Group III search (claims 97-108) would require use of search **Class 707, subclass 102** (not require for the inventions I and II).

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6 A shortened statutory period for response to this action is set to expire **0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.EP 710.02, 710.02(b)).
